

IGLOO SERIES

THE FUTURE OF PLAY STARTS HERE

IGLOO SERIES POST & DECK 2.0

Take a look at Dynamo's Igloo Series!

Similar to post and deck structures, this is the closest we get to traditional play! This series is perfect for younger children, getting them acquainted to rope play through a familiar structure.

Our Igloo series comes in a variety of shapes and sizes, with the ability to add additional slides, panels, climbing walls, shade components and much more.

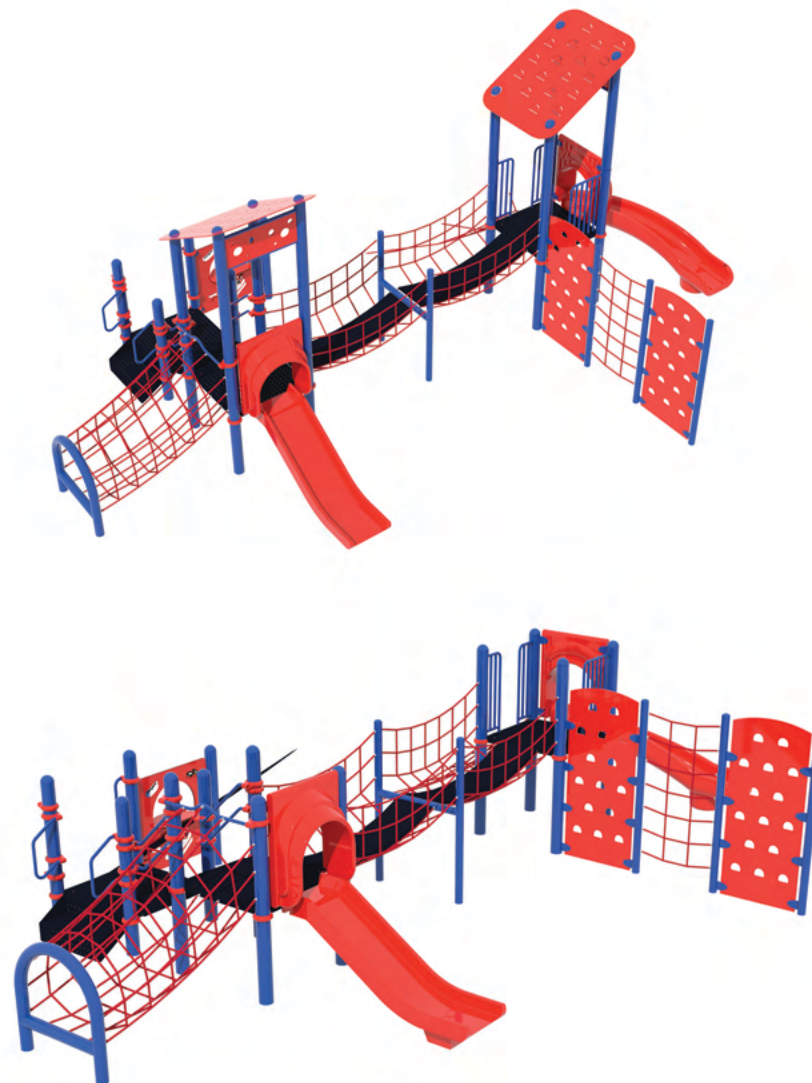

This game is also ADA accessible, allowing children with reduced or low mobility in on the fun as well.

Through this game, children can develop their coordination, social interaction, balance, imagination as they play.

Our future designs
come into play from
your imagination.

Our Igloo series is a perfect introduction
to rope play in any community.
